Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

- ☐ the entire international application,
- ☒ claims Nos. 1,3-15,26-28 in respect of industrial applicability
because:
 - ☒ the said international application, or the said claims Nos. 1,3-15,26-28 in respect of industrial applicability relate to the following subject matter which does not require an international preliminary examination (specify):
see separate sheet
- ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
- ☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
- ☐ no international search report has been established for the said claims Nos.
- ☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
 - the written form ☐ has not been furnished
 - ☐ does not comply with the standard
 - the computer readable form ☐ has not been furnished
 - ☐ does not comply with the standard
- ☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
- ☐ See separate sheet for further details

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 1, 3-15 and 26-28 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The documents cited in the International Search Report (ISR) are consecutively numbered D1-D9 in the order of their listing. If not indicated otherwise, reference is made to the passages cited in said ISR.
2. The subject-matter of claims 1 to 28 appears to be novel in the sense of Article 33(2) PCT, since none of the documents of the search report disclose a combination of a PDE5 inhibitor and a pulmonary surfactant.
3. However, claims 1 to 28 cannot be considered as involving an inventive step, Art. 33(3) PCT for the following reasons:

The use of PDE5 inhibitors for the treatment of some pulmonary/lung diseases is known from D1-D5.

Pulmonary surfactants are also known to be useful in the treatment of pulmonary diseases (see D6-D9).

In the absence of appropriate evidence (e.g. experimental data) that specific combinations provide a synergistic effect in the treatment of a specific disease, an inventive step cannot be acknowledged and the invention claimed has to be regarded as arbitrary combinations of compounds.

The applicant is also reminded that synergistic effects are not predictable and are, per definition, unexpected. Thus, even if the applicant would show a synergistic

effect for a specific combination, this would not mean that the other possible claimed combinations would be considered as involving an inventive step, specially taking into account that the specific compounds are structurally different.

4. For the assessment of the present claims 1, 3-15 and 26-28 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
